

SuperClean

Supermax 800 HEPA Scrubber

The Superclean Supermax HEPA Scrubber is our strongest powered HEPA Filter / Scrubber in a compact design.

This unit not only comes with the pre-filter and HEPA filter but comes standard with the particulate carbon filter which is an option on other brands.

SPECIFICATION

Rotomolded Housing
Weight 21 kg
D: 65 x 42 x 57cm

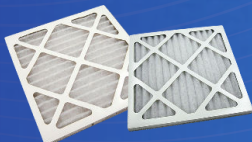

Easy Operation
Plug and Play
Total running hour counter

Primary HEPA filter,
99.97% against any 0.3
micron oily aerosol
particle

Fan speed
adjustment with
amps showed, for
special or pro use

Different filter
combination for
different application

Powerful, stackable unit
Easily transported
Easy to clean

SuperClean

Supermax 800 HEPA Scrubber

With its Roto-moulded design making it strong but also light it has all the attributes you come to rely on from Superclean products, with its filter change light, led display power draw for clear identification for customer satisfaction and technician accountability.

Whilst this unit is strong in power it is in the same sizes as other popular machines on the market.

Supermax 800 HEPA Scrubber

Filter Options

Primary HEPA Filter - Part No. F321

HEPA filter media efficiency rating of 99.97% against 0.3-micron oily aerosol particles provides highly effective filtration. Unit's filter change indicator light alerts you to change the HEPA filter (change more frequently in compromised environments to prevent cross-contamination).

Prefilter - Part No. F271

Sturdy, high capacity filter effectively captures airborne particles and protects the longevity of HEPA filters - change often to ensure maximum efficiency.

DOP Stage 2 Prefilter - Part No. F415

This specialty filter equips the HEPA 500 for a wide range of sensitive environments that require first-pass high efficiency air filtration. With this filter installed with the standard prefilter and primary HEPA filter, the unit passes laboratory DOP testing.

Activated Carbon Filter - Part No. F397

Extruded activated carbon in this filter equips the HEPA 500 to capture a wide variety of volatile organic compounds (VOCs), including smoke, food odors, fumes from paint and paint thinners, and many other undesirable odors or fumes. Place filter immediately in front of primary HEPA filter and replace as needed when effectiveness lessens.
